

Joseph Kim

Product Designer

Design Projects

iknowball, Web Game (React, Vite, Vercel, Claude Code), UX/UI Designer & Solo Developer

- Designed and shipped a full-stack web game from concept to deployment, drafting real NBA rosters across six decades and grading simulated seasons against real per-season player statistics.
- Conducted two rounds of user research (four in-depth interviews, a 20-person structured playtest) to surface usability and content gaps, then directed 15+ shipped iterations including a rebuilt 3D roll animation and redesigned stat legibility.
- Audited and corrected a systemic player-rating bug across roughly 1,690 entries and restructured the tier-rating scale, resolving accuracy complaints raised directly by playtesters.

Aqua Integrity Pool Services, Business Website (Squarespace, Jotform, QR Code Generation), UX/UI Designer

- Owned end-to-end design and build for a new pool-service business with no prior digital presence, from brand identity through launch, with no designer-developer handoff.
- Developed a complete visual brand identity (color palette, typography, and messaging) to establish market trust and credibility for a first-time business owner.
- Designed and implemented a technician-level QR referral system, routing scanned leads to dedicated intake forms, giving the owner full visibility into lead source and conversion.

Parry, Payments Concept (Figma, HTML/CSS/JS Prototyping), UX/UI Designer

- Designed a concept product translating opaque chargeback dispute codes and evidence requirements into plain-language guidance for small-business merchants.
- Prioritized time-to-deadline over dollar amount in a dashboard's visual hierarchy, based on the outsized cost of a missed response window.
- Built an email-based "Quick Read" case summary with a confidence signal and day-count urgency framing, to reach merchants who don't proactively check a dashboard.

Work Experience

Aquaintegrity Pool Service — San Diego, CA | June 2026 - Present

Website Design Contractor

- Partnered directly with the business owner to define project requirements and priorities, functioning as both product owner and primary stakeholder throughout the design process
- Balanced business constraints (budget, platform limitations, timeline) against user experience goals, mirroring the trade-off conversations typical of cross-functional product teams
- Delivered a live, production website that continues to serve as the client's primary customer acquisition channel

Prehab San Diego — San Diego, CA | Jan 2025–Present

Front Desk Administrator

- Facilitated running workshops with local run clubs to promote business and reach new clients
- Managed all front desk communications with new clients, prospective clients, and current clients regarding scheduling, payments, intakes, etc
- Designed monthly newsletters and marketing materials for events

SoleSeattle — Lynnwood, WA | 2022– Dec 2024

Manager

- Gathered insight on customer spending to report best selling products to ownership
- Lead facilitation of new product negotiation with sellers
- Collaborated with social media team to brainstorm content and film

Sneak City — Lynnwood, WA | Seattle, WA | Tukwila, WA | 2020–2022

Manager

- Designed and curated instagram content to highlight products and foster engagement
- Promoted to oversee operations across three locations, scaling repeatable customer experiences and operational processes
- Supported high-stakes purchase decisions by analyzing trends and customer spending

Education

DesignLab Foundations, DesignLab UX Academy

Certification, March 2024 - 2026, Completed 480+ hours of intensive design coursework

Western Washington University

BS in Kinesiology, 2018
